Dear Mr. Oswell:

**Enbridge PipeLines Inc. (Enbridge)
Line 10 Westover Segment Replacement Project (Project)
NEB Order XO-E101-001-2017 (Order), Approval of Condition 17 – Heritage
Resources – Proposed track bore under Tract 73**

The National Energy Board (Board) has received Enbridge's submission, dated 11 December 2017, requesting approval of the variance to Condition 17 to allow Enbridge to use a track bore to go under Tract 73 which has ongoing Archeological activities.

The Board reminds Enbridge that it is required to file with the Board the Detailed Feasibility Assessments for the proposed Horizontal Directional Bores, pursuant to Condition 24 (b) of the Order and as committed by Enbridge in its filing for Condition 13 of the Order [NEB Filing ID [A84442](#)].

The Board has considered and approves Enbridge's proposal to perform a track bore under Tract 73. Additionally, the Board waives the 30 day timing restriction set out in the Board's 8 December 2017 letter.

Yours truly,

Original signed by L. George for

Sheri Young
Secretary of the Board
