

We are updating our water supply strategy to ensure a safe, secure and sustainable water supply for Waterloo Region as we continue to grow.

What to expect?

In this study, we will look at future water supply needs for the community through to 2051. A range of options will be developed and evaluated to create a strategy.

What's the process?

This study is being completed as a master plan and will follow the requirements of Phases 1 and 2 of the Municipal Class Environmental Assessment (as amended February 2024), an approved process under the Environmental Assessment Act.

We want to hear from you!

We will share information with you throughout the study and ask for your ideas. The feedback you provide, along with the technical studies and advice from experts in the field, will help us make decisions for the strategy.

Stay in the know

The best way to get involved in this study, receive updates and next steps, is to subscribe to the EngageVR project page at engagewr.ca/watersupply.
