

ORGANIZING BEYOND ELECTION CYCLES:

Social Development Centre
— WATERLOO REGION —

A Forum for Building Community Power in WR

How do we craft stories that create buy-in for a fairer society?

When it comes to social change and building a more just and compassionate world, the stories we hear (and the stories we tell each other) play a powerful role in shaping what we believe is possible.

After two whirlwind elections and local political developments that have left many of us reeling, join us for a conversation on the need for narrative change. Together, we can organize beyond election cycles, craft new stories that inspire hope, and build local community power to enable the futures we want.
