Ext.105 (Emily)

Website: www.infinitemenergy.com

INFINITUM ENERGY is hosting a FREE information seminar for anyone that would like to lower their monthly hydro bill or generate an extra income producing solar energy.

Infinitem Energy is a leader in solar applications and LED lighting solutions. We provide consultation, sales, and installation of solar off-grid and grid-connected applications and LED lighting.

Learn why corporations, business owners and home owners are installing solar. The government of Ontario is currently paying solar power producers/generators an incentive that is the best in the world. Guaranteed for 20 years, the incentive offers an approximate 10% return on your investment. No savings? No problem! Even with financing you can still make your payments and put cash in your pocket. Find out how this is possible, why it is a good thing, and how it can work for you.

Not just solar energy offers incentives; your local distribution company provides grants towards retrofitting your home or facility with efficient lighting solutions.

If you wish to gain general knowledge, learn more about the FIT program and review, install a solar system or retrofit your home or business with LED lighting please come join us to learn more, meet other individuals with similar interests and gain confidence in your investment ideas.

Please note; we reserve the right to reschedule on short notice. Please RSVP so that we may keep you informed of any changes. Thank you.
